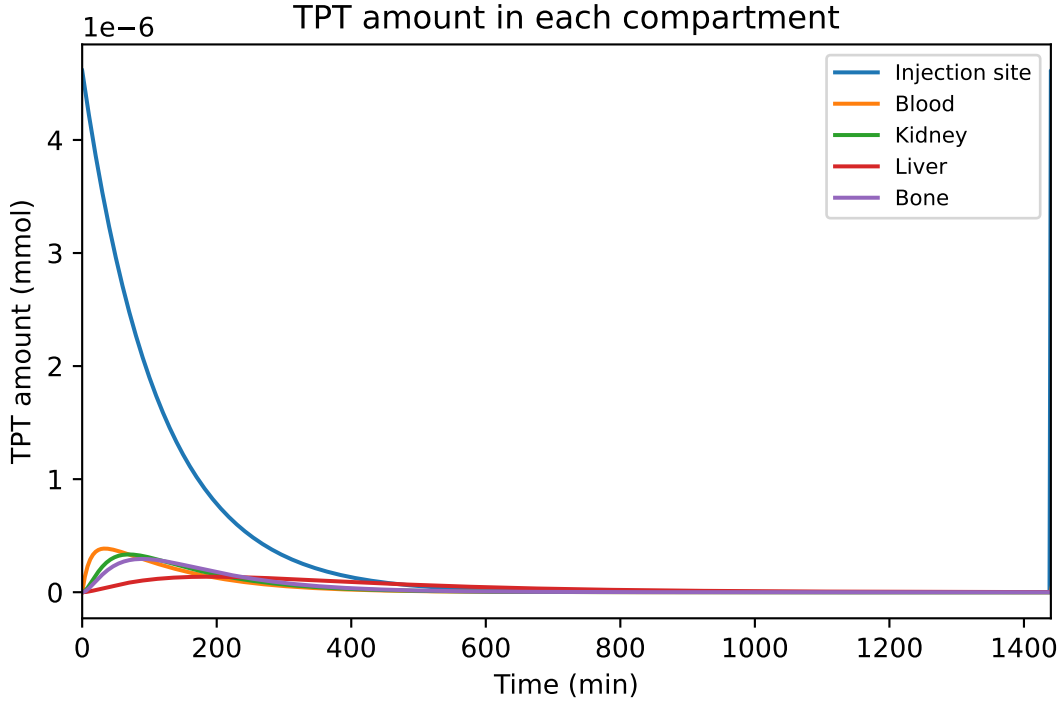
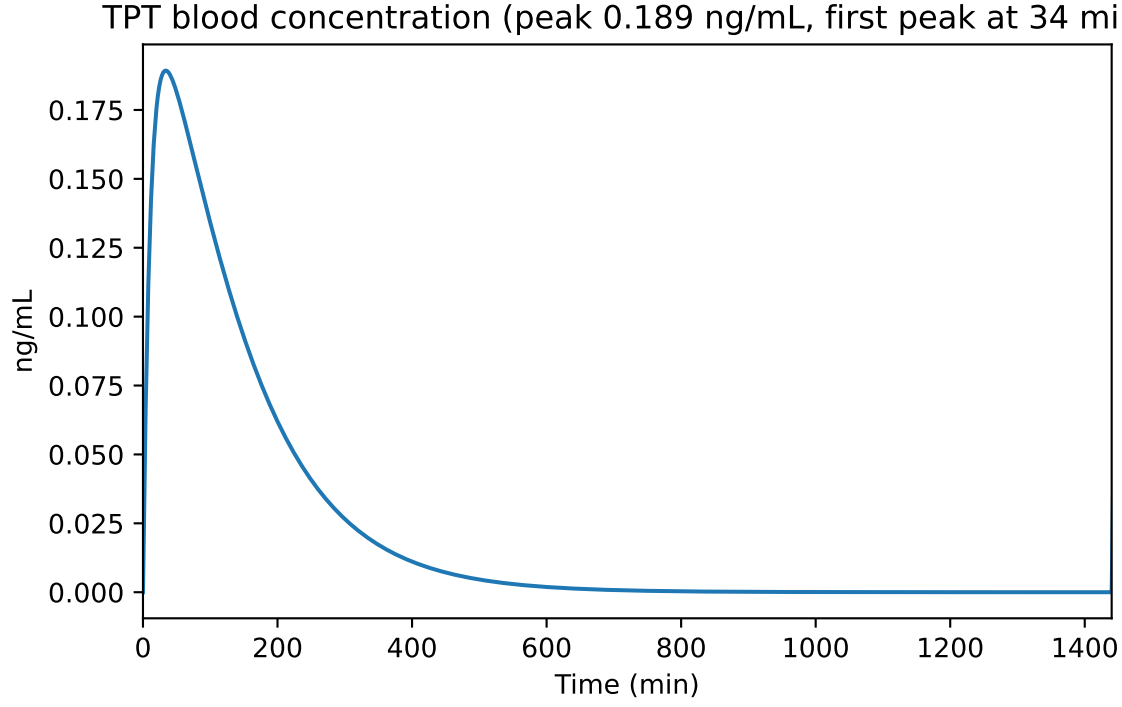
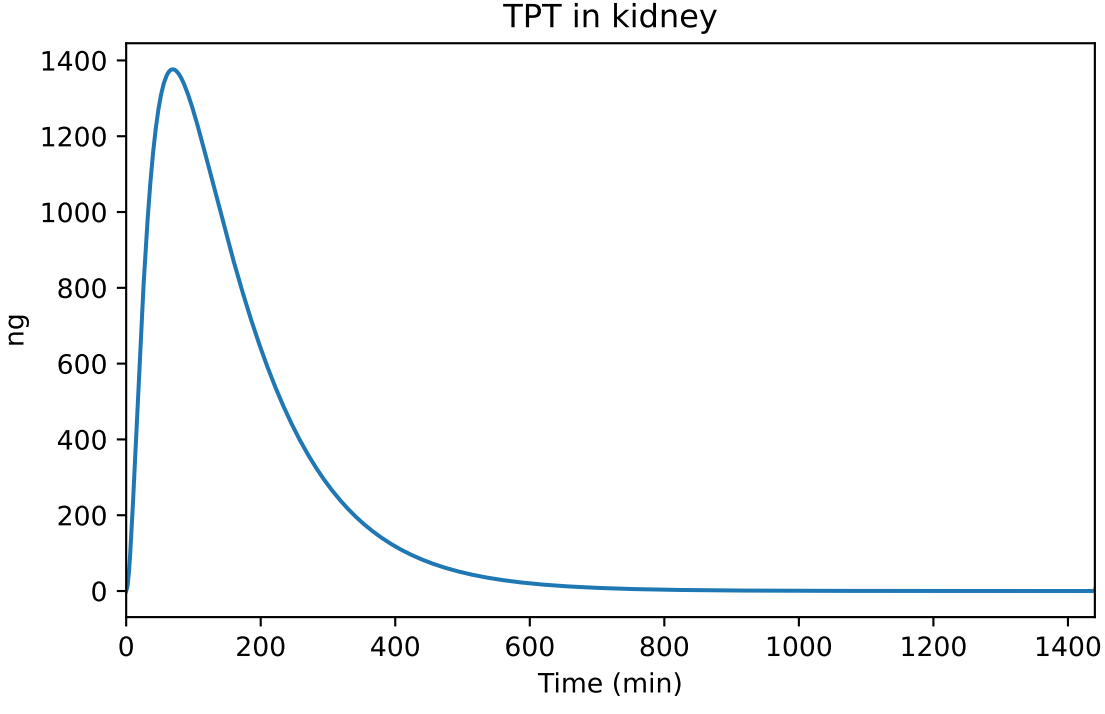
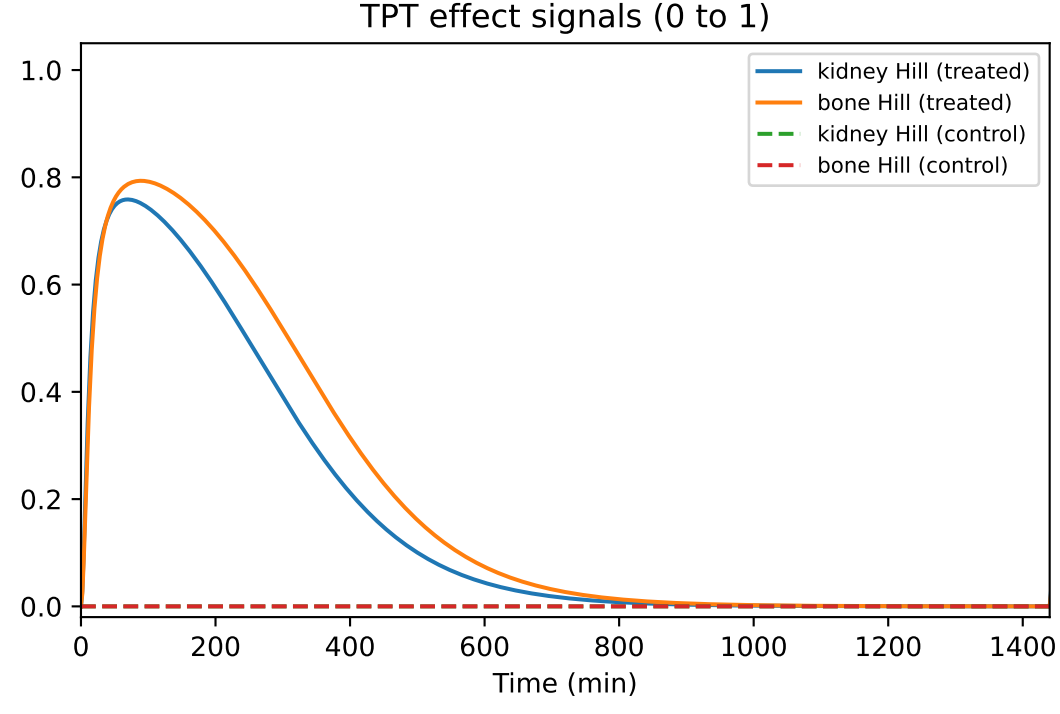
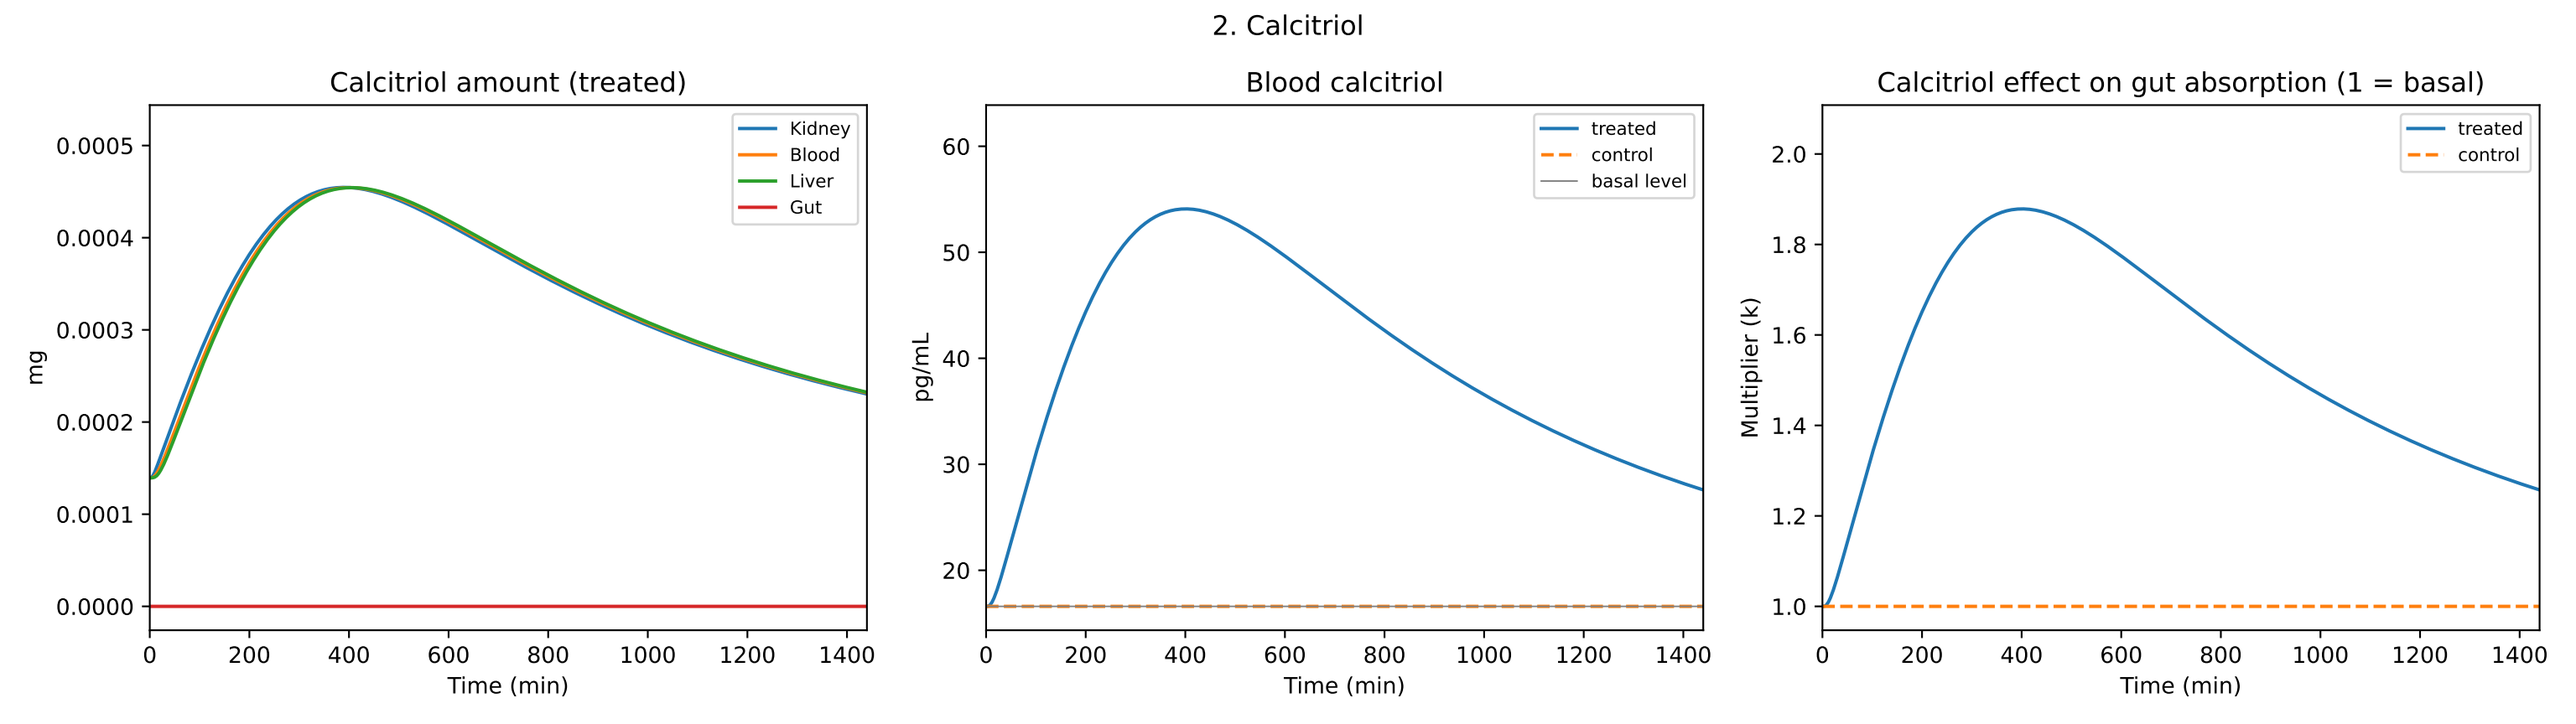
1. TPT pharmacokinetics



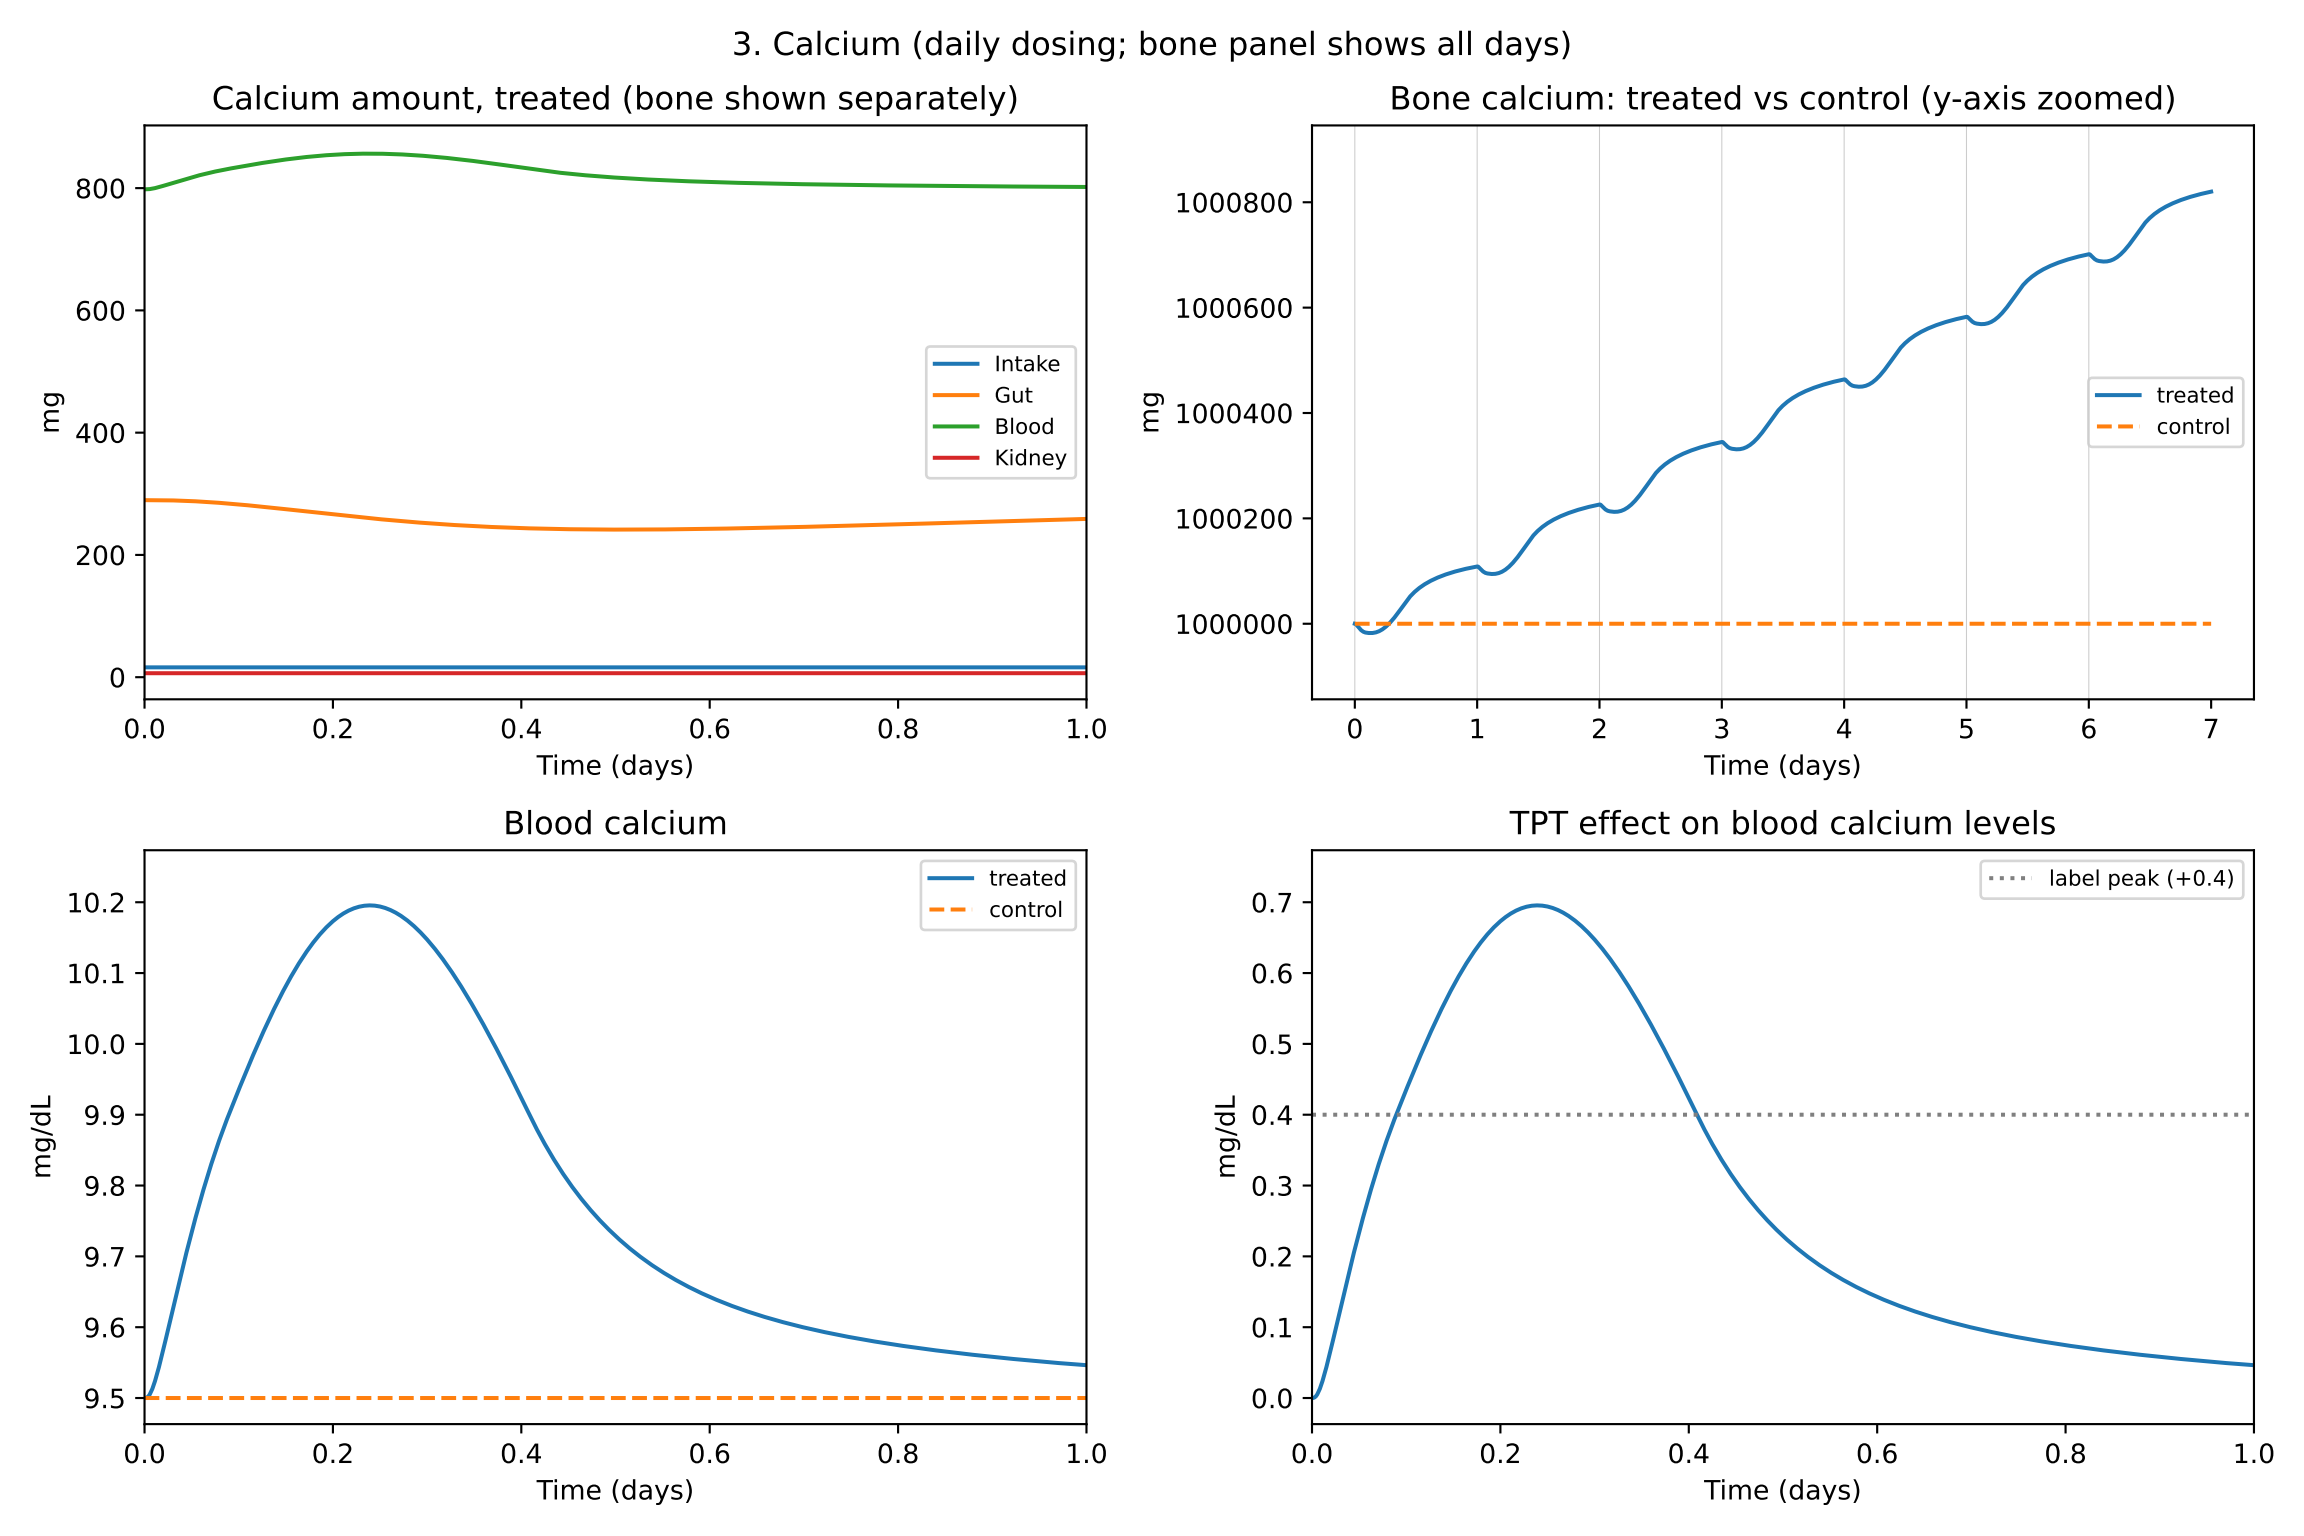




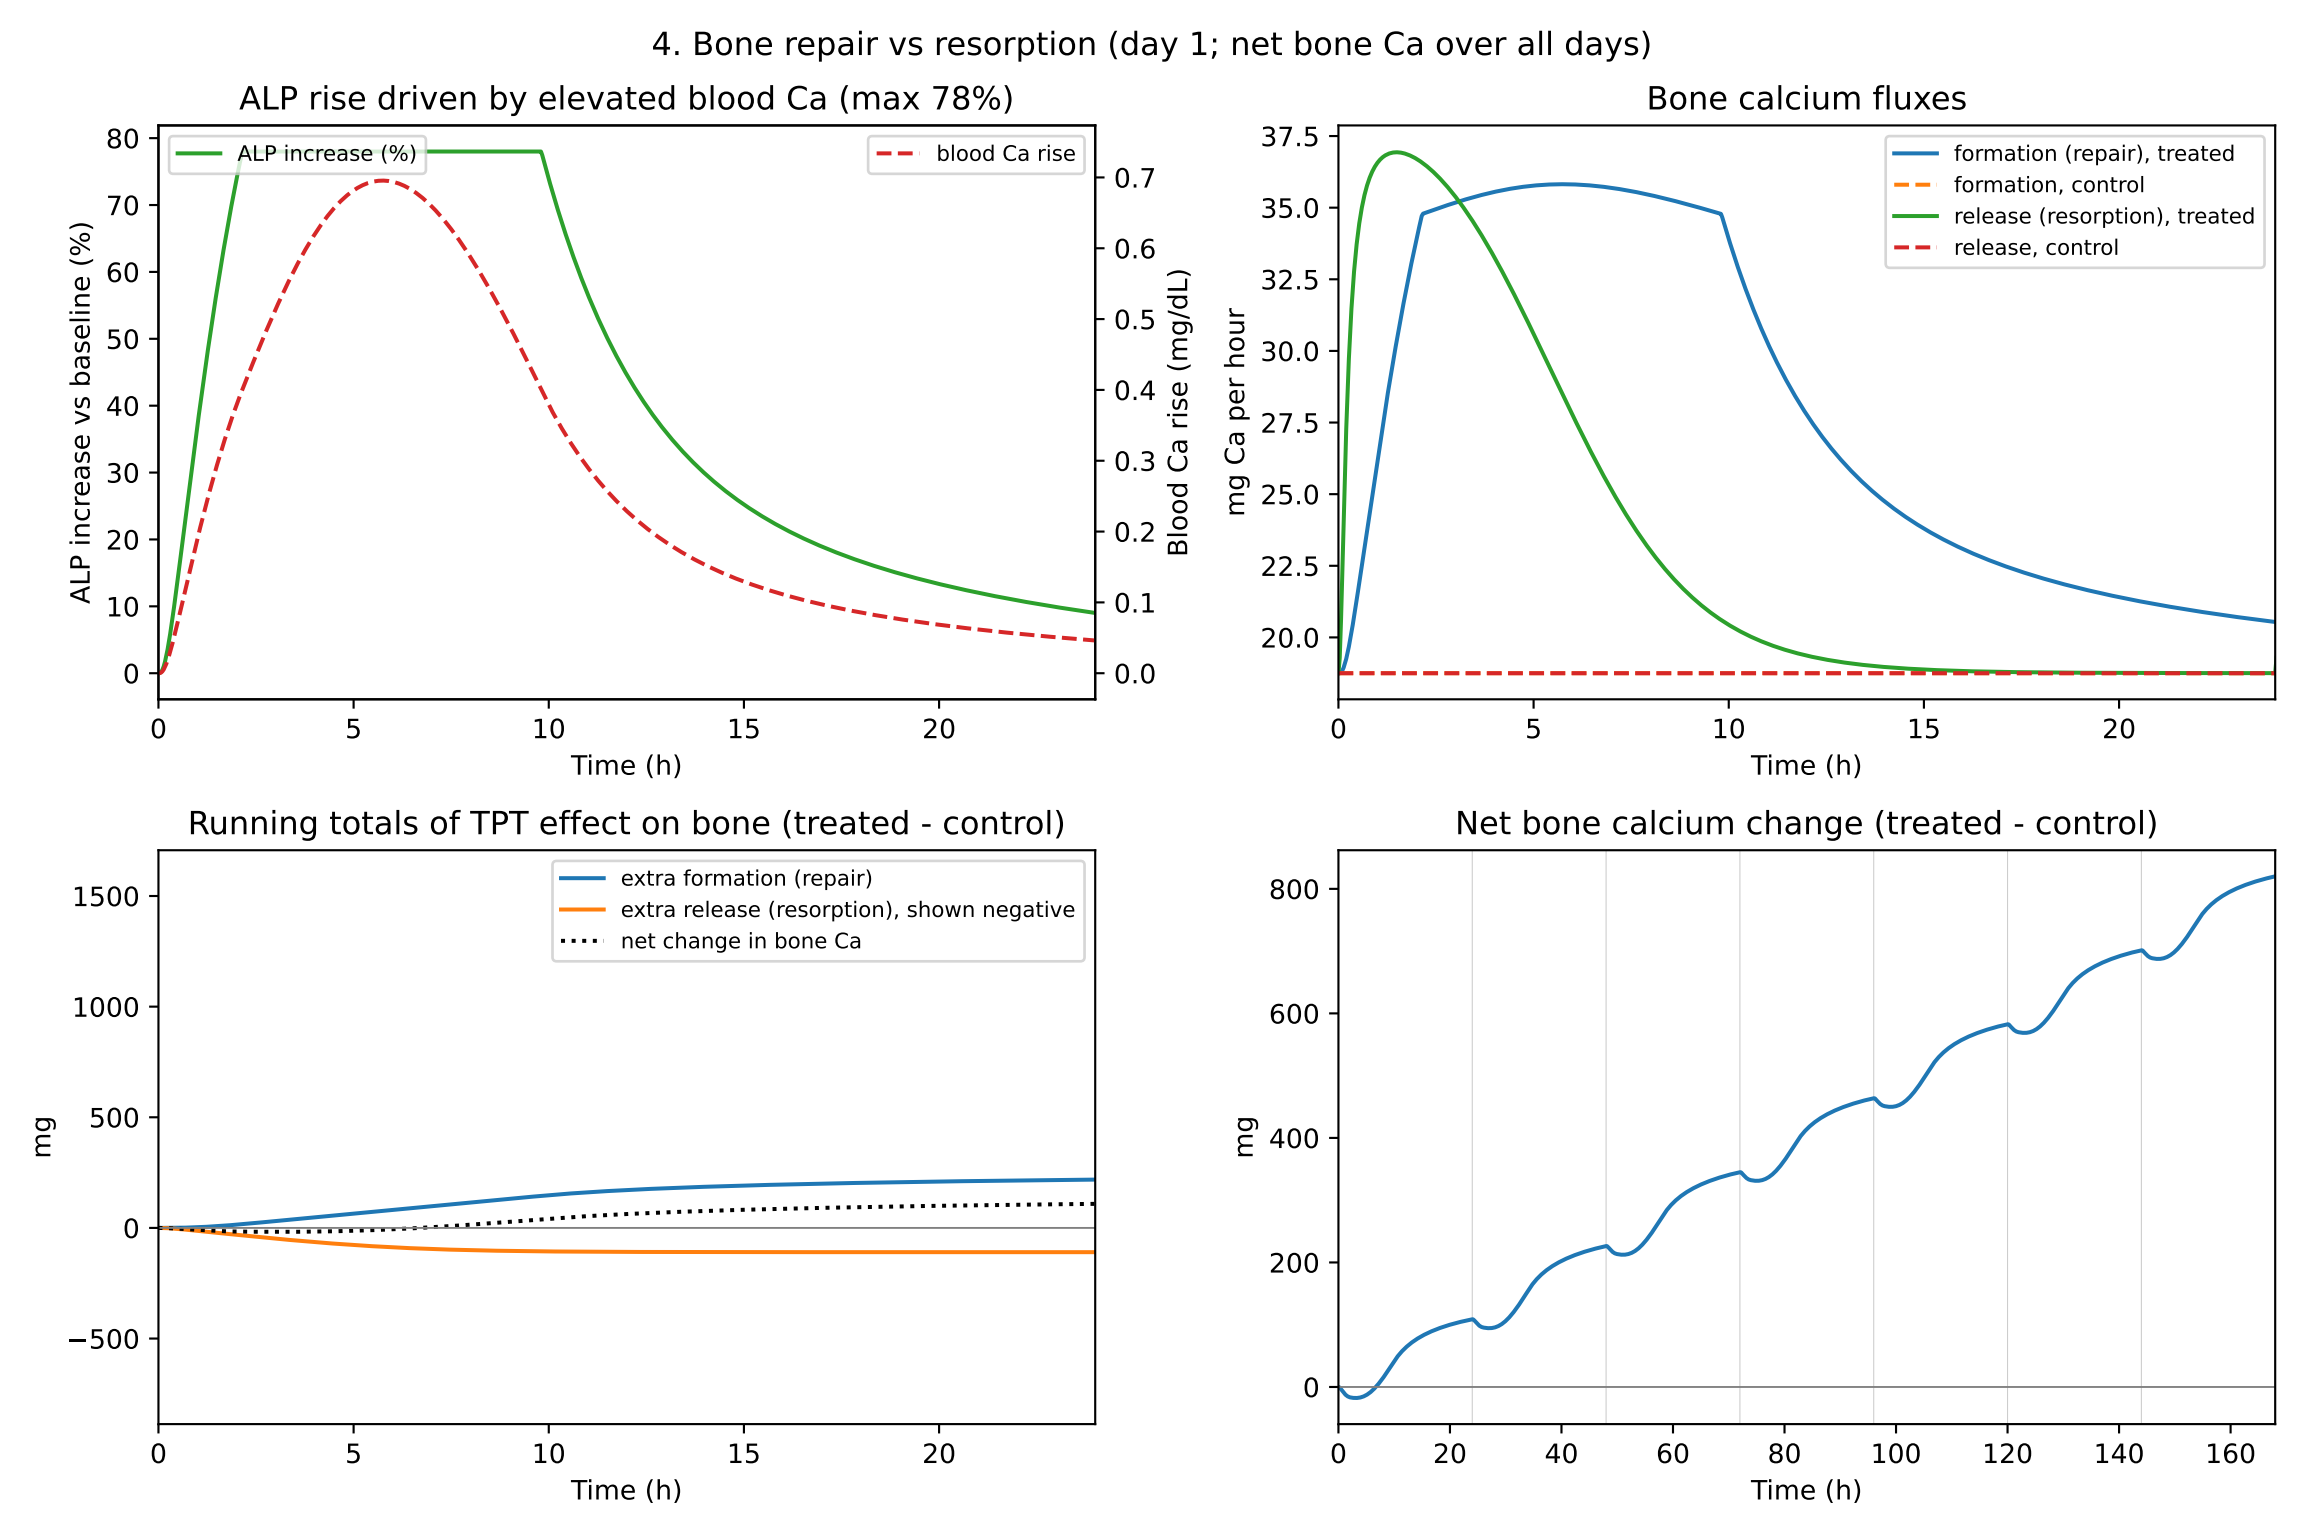




2. Calcitriol
Calcitriol amount (treated)
Kidney
Blood
Liver
Gut
mg
Time (min)
Blood calcitriol
treated
control
basal level
pg/mL
Time (min)
Calcitriol effect on gut absorption (1 = basal)
treated
control
Multiplier (k)
Time (min)



3. Calcium (daily dosing; bone panel shows all days)
Calcium amount, treated (bone shown separately)
mg
Time (days)
Intake
Gut
Blood
Kidney
Bone calcium: treated vs control (y-axis zoomed)
mg
Time (days)
treated
control
Blood calcium
mg/dL
Time (days)
treated
control
TPT effect on blood calcium levels
mg/dL
Time (days)
label peak (+0.4)



4. Bone repair vs resorption (day 1; net bone Ca over all days)
ALP rise driven by elevated blood Ca (max 78%)
ALP increase (%)
blood Ca rise
ALP increase vs baseline (%)
Blood Ca rise (mg/dL)
Time (h)
Bone calcium fluxes
formation (repair), treated
formation, control
release (resorption), treated
release, control
mg Ca per hour
Time (h)
Running totals of TPT effect on bone (treated - control)
extra formation (repair)
extra release (resorption), shown negative
net change in bone Ca
mg
Time (h)
Net bone calcium change (treated - control)
mg
Time (h)
